Personally appeared before me,
this July 2 1906, E. J. Paxton, general manager of The Sun, who affirms that the above statement of the circulation of The Sun for the month of June, 1906, is true to the best of his knowledge and belief.PETER PYREAR,
Notary Public.

My commission expires January 22, 1908.

Daily Thought.

"One's work is entitled to his best."

The developments at last night's meeting of the school board point unmistakably to the fact that it is time to break the deadlock on the election of an English teacher. Such reckless disregard for the welfare of the Paducah public schools as was manifested by Trustee Byrd when, from pure malice and for political reasons, he drew into public discussion a rumor in such a manner as to cast aspersions on the character of two members of the teaching staff, can not longer be abided by the citizens of Paducah. If reprisals are made on the other side, there is no telling to what extent the school system may be injured by this wretched quarrel, and the schools may not recover from the effects for years. The schools never were in better condition than they are today, and if the bickering of the board affected no one other than the trustees and their political fortunes, the public might look on with complacency, but the names of the superintendent, the principals and the teacher involved are constantly paraded in the discussions, and the public entertains entirely erroneous impressions of the cause of the deadlock. Both Prof. C. M. Lieb, superintendent of the schools, and Miss Emma Morgan, the present incumbent of the chair of English, have been misrepresented in statements given out from apparently authentic sources, and by the press. Neither Prof. Lieb nor Miss Morgan have done or said the things attributed to them by partisans in the quarrel and it will require only a little explanation on the part of everybody concerned to effect an adjustment of this difficulty. Explanations are necessary because of the overzealousness of participants in the fight, both inside and out of the board. The Sun has only one thought, and that is the good of the Paducah public schools, and we can see no good in a continuation of this deadlock.

That British coroner's jury had better do its duty, according to that "old British idea of justice," of which we in America have heard so much, or a favorite theme of a lot of people who are not acquainted with statistics will be forever lost to them. The last report was that a "queer formalism" had so far prevented the jury from inquiring into the cause of the accident. It is the reckless speed of America in general to which all our accidents are attributed abroad, and justly so in most cases we rather proudly than otherwise admit; but, if the coroner's jury will ascertain how fast the London special was running when it jumped the track, we will be satisfied to allow the cause of the accident to remain through time hidden behind that ponderous British "formalism." We would not dare to intimate, even negatively, the possibility that an English official could be influenced by anything save a stern and rugged sense of duty.

Ollie James had better not stay too

SHE WAS CONSIDERATE.

Miss Gladys: "Are you fond of music?"
Mr. Critic: "Very."
Miss Gladys: "Then I won't ask Mr. Neverstep to sing."

long across the water if he intends to run for governor in Kentucky. Sentiment may crystallize on his as the logical candidate of Democracy for the presidency. Remember what has happened to William Jennings Bryan.

When the source of the school board's information, concerning an alleged flirtation between two of the teachers, was questioned, President Williamson replied that a little Byrd told him.

Lax execution of the laws reached its limit yesterday. Chief Lloyd stole a base at League park before the eyes of at least two officers, and was not arrested. It was not his first offense, either.

Never mind about the idle rich. They do not constitute a sociological problem in Paducah. But we have some idle poor here who need police attention.

It begins to look as though Secretary of Agriculture Wilson will not get a vacation this summer. He has to see that the meat is properly stamped and the right label on the bottle.

Give heed to the day for just one fleeting moment. Inform your children that this is the one hundred and thirtieth anniversary of the signing of the Declaration of Independence.

Ella Wheeler Wilcox is of the opinion that Harry Thaw should be set free; but as all of Ella's opinions are copyrighted as soon as born, the rest of us cannot adopt them.

This is the day the small boy celebrates. Tomorrow is the day his parents mourn.

What is a sane Fourth? The way way they celebrate it in England?

Don't blow the powder. Don't rock the boat.

Hot Days Beneficial.
It is strange we never stop to realize that the hot days are good for us. They are tho', just as they are good for crops. Nature sends the hot days to give us a good "sweating"—if the use of the vulgar word is permissible for in this way it eliminates some of the poisons from our systems. If we would get out of doors, instead of sitting in the shady nooks, and take two or three hours in the open air with the "boiling sun" boiling us right we would feel lots better, and be lots better.

This is a correct theory, and is the theory that prompted the invention of the hot-air treatments I am giving with such success in my practice. When used in connection with Oste-

Myriose makes you feel better. Lax-Pol keeps your whole system right. Sold on the money back plan everywhere. Price 50c.

opathy, it is a specific for the ailments that give us Paducahans the most trouble malaria, chills and fever and biliousness, and I can in just a few minutes show anyone suffering of these ailments why they yield so readily to the treatment. I can refer you to people you know who will attest to my statements.

If you feel drowsy, and tired; fee like you had a taut band around your head which was being drawn close all the time; if you are suffering of indigestion of any form, a course of Osteopathic and dry hot-air treatments will bring a quick cure, and do so without the aid of anything but aids to Nature.

My office hours are from 9 to 12 and from 2 to 5, Dr. G. B. Froage 518 Broadway, Phone 1407.

NEW RECORD BY TYPESETTER

Charles A. Nichols, of Salt Lake City, Breaks World's Mark.

Salt Lake City, July 4.—Charles A. Nichols, an employee of the Salt Lake Herald, broke the world's record for linotype composition last night, finishing at an early hour this morning. Mr. Nichols set 106,399 ems of nonpareil type, corrected, in seven hours and fifty-two minutes actual working time. The previous record for eight hours was made by George A. Green in Chicago in 1896 at a meeting of the International Typographical Union. Nichols' average per hour for the entire time was 13,287 ems, which exceeds the world's record for an hour. The type set takes up 340 inches of a standard width newspaper column and 127 pounds of metal was cast.

RECEIVER TAKES TRACTION CO.

Toledo and Western Fails to Pay Interest on Bonds.

Toledo, July 4.—A receiver was appointed here for the Toledo and Western Railroad company, which operates a traction line with sixty-seven miles of track from Toledo to Payette, O., and with a branch to Adrian, Mich. The company also controls the Toledo, Payette and Western Railway company, which has fourteen miles of road. It is understood that the cause of the receivership is due to the fact that the company would be unable to meet the July interest on \$50,000 of Toledo, Payette and Western bonds. Luther Allen of Cleveland, the financial backer of the property, died some time ago.

GIRL OF FIVE RESCUES SISTER

Little Heroine Puts Out Fire, Saving Child's Life and Her Home.

Carney, Wis., July 4.—Violet Peterson, 5 years of age, proved herself a heroine today by saving the life of her sister and extinguishing a fire that would have destroyed her home. The sister is 6 years old. The two were alone in the house. The older girl tried to freshen the fire with kerosene and started the blaze. Her dress afire she attempted vainly to smother the flames in a blanket. Then she told Violet to throw water over her. The child kept her head and obeyed her sister's commands and then drawing water from the well extinguished the fire in the kitchen which was burning briskly.

The thing that makes a pretty hat is the face under it.

RED TYRANT QUILTS
THE CZAR'S PALACEReport of Trepoff's Dismissal
Accredited.Ruler Is Hoping to Placate Duma in
Selecting Cabinet—Conspiracy
in Army.

MARTIAL RULE FOR ODESSA.

St. Petersburg, July 4.—Gen. Trepoff, the military tyrant who has ruled St. Petersburg with an iron hand since the famous "Red Sunday," is at last in disgrace, if reports from an unusually good source is true. It is said that after a disagreeable interview with the czar he has been relieved of his command and is quitting Peterhoff.

This fact, combined with an interview with M. Sturmer, formerly assistant to the late Von Plehve, in which Sturmer takes a liberal view of affairs, gives rise to the belief that the czar is preparing to back down.

It is also significant that Premier Goremykin had a long conference with the emperor, and it is reported that the contemplated change in the ministry was discussed. It is evident that there is a desire on the part of the czar to placate the duma. The most significant step in this direction is a statement that the government is ready to accept the laws passed by parliament for establishing liberty of conscience and freedom of meet.

Conspiracy in Army.

St. Petersburg, July 4.—All doubt of the existence of an organized military revolutionary league, which is inspiring mutinies and uprising in the army has been set at rest by the discovery of the seal and documents of the league during the search of headquarters at Vilna and detailed to various regiments of the Third corps. Martial law was proclaimed today at Odessa on account of the foment among the troops there.

HAD TO EAT CANDLES.

Two Men Imprisoned for Six Days
Are Finally Recovered.

London July 4.—After being imprisoned for six days in the flooded Cardiff Vale colliery, two miners of the six originally imprisoned were rescued alive this morning and two bodies were brought out by the rescue party. The search will be kept up, although all hope of finding the missing men has been abandoned. The two men rescued were discovered in the old workings, having subsisted for a week on a few candles. One of them was still able to walk and the other was delirious during the last part of his imprisonment.

MUST PROVIDE SEATS

Warrants Sworn Out for Proprietor
of Big Store.

St. Louis, Mo., July 4.—City Attorney Thomas L. Anderson, with Detectives McGrath and McQuellan, today took out a warrant against G. A. Coutant, general manager and superintendent of the William Barr Dry Goods company, charging him with failure to provide proper seating facilities for certain of his women employees. Detective McGrath, who swore to the information, charges that in the comb and notion departments four girls were employed and no seats provided for them.

ANTI-CIGARETTE

Measure to Be Adopted By English
Parliament.

London, July 4.—Edward Page Gaston, of Chicago, testified today before the select committee of the house of lords on juvenile smoking that the worst article America sent to Great Britain was the American cigarette. The proposed British bill, which probably will receive the endorsement of the house of lords committee, provides for a fine of \$5 for the first offense in supplying tobacco to minors, \$10 for a second offense, and the revocation of the offender's license on a third conviction.

AT OYSTER BAY.

Fourth of July Celebrated In
Improved Style.

Oyster Bay, July 4.—In spite of threatening skies and ground sodden with rain the president's neighbors went enthusiastically ahead with the Independence Day celebration at Ocean Grove. President Roosevelt reached the grounds before the exercises began. He clapped his hands when a choir of school children sang the "Star Spangled Banner." The president went at once to the picnic grounds, where he delivered an address.

Remarkable Growth of Automobile
Manufacture in the United States

More than four million dollars' worth of automobiles will have been brought into this country during the fiscal year which ends with the present week, and more than three million dollars' worth exported during the same time. Figures of our foreign commerce in automobiles, as announced by the department of commerce and labor through its bureau of statistics, show the value of automobiles imported in the eleven months ending with May to have been \$3,502,244, and of parts thereof, \$378,389, while exports thereof during the same months amounted to \$2,957,748.

It is apparent, therefore, that the figures for the full fiscal year which ends with Saturday of this week will show more than four million dollars' worth of automobiles and parts thereof imported and more than three million dollars' worth exported. Meanwhile the manufacture of automobiles in the United States has amounted to presumably more than twenty-six millions of dollars, since the bureau of the census has recently issued a preliminary statement which shows the value of automobiles manufactured in the United States in 1905 at \$26,645,064. This figure includes amounts received for custom work and repairing and value of products other than

automobiles; but as it does not include automobiles valued at \$879,205, manufactured in establishments engaged primarily in the manufacture of other products, it may probably be safely set down that the value of automobiles produced in the United States approximates twenty-six millions of dollars and the imports four millions, and that out of the total of thirty million dollars there was exported about three million dollars' worth.

The rapid increase in the use of automobiles is shown in a marked degree both by the figures of the bureau of statistics and those of the bureau of the census. The value of automobiles manufactured in 1900 is given by the census figures at only \$4,748,011 and in 1905, as above indicated, at \$26,645,064. The bureau of statistics figures will show approximately four million dollars' worth of automobiles imported in the fiscal year 1906, against less than two and one-half millions in 1905, about one and one-half millions in 1904, and about one million in 1903.

Of the three million dollars' worth of automobiles exported in the fiscal year just ending, about one-half goes to Europe and most of the remainder to Canada, Mexico the West Indies and Australia.

Advises Her Hostler Lover That
He Must Put Talcum on His Feet

Pittsburg, Pa., July 4.—No sensation which has ever broken loose in a divorce trial in the Pittsburg courts equalled that which developed today in the divorce suit of Augustus Hartje against his wife, Mary Scott Hartje. With her cheeks paling and blushing with indignation by turns Mrs. Hartje sat in the court room and heard read twenty letters which her husband alleges were written by her to Thomas Madine, the Irish coachman, whom Hartje has named as co-respondent. The letters were filled with the most loving sentiments, breathing passion, in every sentence, assuring him of her undying love, that she had left

her husband for him and would never love anyone else. She accused him of growing cold towards her but said her heart was on fire with love for him and would always be so, interspersed with all these loving messages were such practical advice as for him to be careful about brushing the horse dust out of his hair, not to neglect his bath, to put talcum powder on his feet and be sure and change his socks daily. The crowd in the court room wanted to laugh, but Judge Frazer suppressed all levity. He looks upon this as a tragedy, not a comedy. Mrs. Hartje denies authorship of the letters. Tomorrow the defense will seek to prove that they are forgeries.

JOINT DEBATE

WILL BE HELD BETWEEN PAT-
TERSON AND EVANS.Tennessee to Be Treated to Another
Great Display on Hastings
This Fall.

Memphis, Tenn., July 4.—The nomination of H. Clay Evans by the Republicans is a foregone conclusion, and along with that come two interesting statements. The first is that Mr. Evans will accept the challenge of Gen. M. R. Patterson, the Democratic nominee and will meet him in a series of joint debates. The second is that the Republican platform will contain two planks rejected by the Democrats. The first provides for a general local option law throughout the state, and the second would prohibit gambling on racing.
